## SUMMARY

---

Highly motivated and analytical computer science graduate with professional experience developing and deploying web applications. Accomplished software developer with excellent interpersonal skills and the ability to work effectively independently.

## EXPERIENCE

---

### Director of Messages of Hope

Messages of Hope (MOH) C.I.C.

November 2023 - Present, Remote

- Designed and developed the Messages of Hope website ([www.messagesofhope.co.uk](http://www.messagesofhope.co.uk)) from concept to deployment, leveraging Figma for user interface and user experience design. Utilized the NextJS framework to build a high-performance site with responsive design.
- Organise events and campaigns to support Messages of Hope's mission in to supporting individuals struggling with mental health by encouraging people to write uplifting messages
- Helped to organise Connections 2024, a poignant short film created by Messages of Hope and Speakers Collective for Mental Health Day 2024 funded by The Mayor of London and Thrive LDN.

### Web Developer

Freelance

April 2023 - Present, Remote

- Designed and launched multiple static mini-sites using HTML, CSS and JavaScript.
- Developed tailored components for Wix sites, using Velo by Wix API, to introduce user specific content capabilities.

### Website Intern

University of St Andrews's Student Association

August 2023 - April 2024, Remote

- Collaborated closely with the design department to enhance the website's aesthetic appeal and functionality through targeted updates and new feature additions.
- Implemented pages and mini-sites utilising JavaScript, HTML and CSS, facilitating strong user interactions and consistent site functionality.
- Conducted in-depth website analytics to enhance user engagement, presenting findings in a comprehensive written report and interactive presentation for the management team.

## EDUCATION

---

### BSc Computer Science - Current

University of St Andrews • St Andrews, Scotland • 2025

- Awarded with The Dean's List last year for academic excellence, and a medal for my performance in Module CS2006 - Advanced Programming Projects.

## SKILLS

---

Proficient Programming Languages: Java, C, Rust, JavaScript, Python, HTML/CSS.

Tools: Git/Github, Docker, PostgreSQL, JIRA.

Experienced user of Linux and Unix systems, with strong web development skills using NodeJS, React and NextJS. Soft skills include project management, customer service, problem solving and adaptable thinking.

## RECENT PROJECTS

---

### PhoneArmour

[phonearmour.jonathandevans.dev](http://phonearmour.jonathandevans.dev)

- An example website used to design and purchase a custom phone case by uploading an image. The application is built using NextJS framework and hosted on Vercel.

### Gomoku

- An implementation of the game Gomoku in Haskell. This game not only provided a GUI and local play, but also network play through peer-to-peer networking.
